

## The Living Experiment

Figuring out life one educated guess at a time

# What is this!?! Dynamic dilation that's fun!?! (SRS+14)

So I don't know what happened. I really don't. But something felt good down there, and my nerves were firing in a good uncontrollable way again today (it started last night). I felt like I was having mini-panic/anxiety attacks, or what I hear the symptoms are, with tight chest, heart beats I could feel, and super on edge. But I think it was just my body was getting used to some new stimuli that it hasn't felt before. And it was good.

Apparently it was good enough that Oxytocin I think was getting released, and I was able to dilate dynamically without a pain killer but it was as easy as if I had taken one. There was like no pain. It was awesome. If those were mini-orgasms, or a sign of what I have to look forward to, holy shit will that be cray cray. Yes I used cray cray. Legitimately. Get over it. Also, I look forward to when I can enjoy things inside me. Not be super annoyed with it.

I know other girls have said they've gotten off, or come close, or had good feelings during dilation but up until today I hadn't had any of that stuff. So it was cool to see that it could happen and one day I'll get to where this whole thing is enjoyable. Just a long road it feels to get there from here. But I'll get through it one day at a time.
