

The Living Experiment

Figuring out life one educated guess at a time

Two months down... Oh and birthdays suck (SRS +56 days/8 weeks)

So... I made it through month 2 and have started month 3. And I happened to have a birthday right around that point. One of those stupid decade so-called important ones. And it sucked. I can't do what I would've done to celebrate pre-op. I can't celebrate how I'd want to post-op. And I can't have the one fucking thing I want for my birthday. Sex with one of my partners. Perhaps the worst birthday ever. I know the future is great and all, but fuck if the present doesn't majorly fucking blow.

I ran out of condoms now, and have stopped using them. I had bought a 144 pack off Amazon for like \$15 just because for some reason using them still was an idea that seemed right to do. I'm about 1/3 of the way through my QC gel, and I'm debating starting to mix in some coconut oil in the next few weeks (seems like most things say 3 months/12 weeks, but then many post-op girls in the suporn FB group seem to use it sooner). I'm still using the tarp thingy and absorbent pads because I'm lazy and don't want to soak through towels.

One semi-positive thing is that my one gf and I played a bit Sunday morning by her fingering me and I likely would've gotten off. Unfortunately it caused bleeding, which is not unexpected in the least. Also I hadn't dilated yet, so next time will be post-dilation. So I'll likely need to give it another week or two before trying again. Although I guess it'd need to be this weekend as the one after isn't available. Damn. So one or three weeks it looks like. We'll see.

Things are looking overall better down there and I can sit without a cushion to an extent. Sometimes I need to cross one leg under the other which helps to shift

weight back and off the pussy. There's still constant pain in some way. Usually around the outer lips. I've taken Tramadol off and on as needed which is wonderful stuff. Not sure I'll be able to get more though unfortunately as I take 2-3/week which means I'd run out month 4-5ish. The clit is way off limits still as it's very uncomfortable to do anything other than in the vagina or outside rubbing.

I can now hit almost 18. I could likely push to get deeper, but @ 7+ inches (i.e. 17 cm) I don't know that it's really needed. Dilations are still 2x/day most days but things are beginning to get tighter it would seem which seems to happen months 3-5ish. So we'll see what happens there, but I'll likely work to go back to 3x/day as many days as I can each week.

Really I'm just in the "I'm bored and ready to be done with this" phase of things. Upside is I'm about 1/3 of the first major-ish milestone of 6 months. And I'm almost through the first 3 months. So at least there's that... right?
